

Mohammad Ali Shahsavari

FRONT END DEVELOPER

Front-End Developer | 4+ Years in Web & Mobile Development

With over four years of experience in front-end development, I specialize in creating responsive, user-friendly web and mobile applications. My approach is rooted in writing clean, maintainable code and designing seamless interfaces that enhance user experiences. I thrive in collaborative, agile environments where I can contribute to innovative solutions that meet both client goals and user needs. Passionate about continuous learning and staying current with industry trends, I'm always eager to bring fresh ideas and effective solutions to each project.

Employment History

Front-end Developer, Mosavar Sazan - Charsoq, Tehran

JUNE 2023 – PRESENT

Charsoq is a data-driven marketing agency specializing in the pharmaceutical industry. I contributed to maintaining and developing features for their Maris application.

Key Responsibilities:

- **Refactored** the background geolocation tracking structure for better performance and reliability.
- **Rebuilt** components for compatibility across Android and iOS platforms.
- **Resolved** customer-reported bugs inherited within the application to enhance functionality.
- **Updated** the Maris project by performing library version upgrades and implementing React Native enhancements.
- **Modernized** deprecated libraries, ensuring compatibility through TypeScript integration.
- **Implemented** requested features from the company to meet business and user needs.
- **Redesigned** and fully implemented the new UI created in Figma, enhancing the UI/UX across all pages for an improved user experience.
- **Contributed** to the development of the new Maris project using Next.js.

Front end Developer, Tadbir Salamat Marham - Pezeshket, Tehran

NOVEMBER 2022 – JUNE 2023

Pezeshket is the largest online health community for Persian speakers, providing 24/7 access to thousands of healthcare professionals. I played a key role in enhancing Pezeshket's web and mobile platforms, focusing on improving user experience and functionality. My contributions supported Pezeshket's mission to make healthcare more accessible and user-friendly through cutting-edge technology.

Key Responsibilities:

- **Designed and developed** responsive web and mobile application pages using React and React Native.
- **Enhanced** the admin panel, Progressive Web App (PWA), and React Native application to improve performance and usability.
- **Collaborated** closely with development and design teams to identify opportunities for improvement and deliver high-quality solutions.
- **Revamped** the main website and social pages, showcasing creativity and advanced design skills.
- **Refactored** the doctors' page and individual doctor profiles, streamlining functionality and optimizing user experience.

Freelance Experience, Ponisha - Karlancer - Freelancer.com

2022 – PRESENT

React Native iOS Setup Project

Description: Set up and troubleshoot a React Native app using Xcode for iPhone testing.

Challenge: Resolved recurring setup errors, ensuring smooth app deployment on iOS.

Role: Hired as an experienced React Native developer to resolve technical issues.

Technologies: React Native, Xcode.

Movie Download Chrome Extension

Project: Developed a Chrome extension to download movies, subtitles (Persian and English), and posters from select sites, including "King Movie."

Features:

- Right-click download options for movies, subtitles, and posters.
- Integration with IDM and FDM for efficient downloads.
- Auto-naming for organized file storage by title, year, season, and episode.
- Favorite list integration to prevent duplicate downloads.
- Subtitle backup from alternate sites if unavailable on the primary site.

Technologies: JavaScript, Chrome Extension API.

Chess PGN Parsing Function

Project: Developed a JavaScript function to parse chess PGN strings into move objects.

Details: The function handles complex and varied PGN scenarios.

Testing: Rigorously tested with various PGN formats; FEN accuracy verified using chess position editors.

Technologies: JavaScript.

Cross-Platform Blackjack Game Application

Project: Built a cross-platform Blackjack game app for Android and iOS using Expo.

Backend: Developed a Node.js server with WebSocket for real-time gameplay and REST APIs for authentication.

UI: Translated client-provided designs into a responsive, user-friendly interface.

Technologies: Expo, React Native, Node.js, WebSocket, REST API.

Gonbad Kabud – Kids' Interactive Learning & Storybook App

Project: Developed an interactive learning and storybook app for children to engage young users with animations, stories, and educational activities. Built with Expo for Android, iOS, and as a Progressive Web App (PWA).

Features:

- Child-friendly interface with playful characters and animations for a fun learning experience.
- Interactive features for tracing letters, writing practice, and story-driven activities.
- Parental controls for time limits and usage monitoring.
- Engaging learning activities like storybooks, games, and progress tracking.

Technologies: Expo, React Native.

Rekasb Project – Landing Page and WordPress Plugin Project: Developed a landing page using React and created a WordPress plugin to integrate React applications with WordPress. **Details:**

- Designed and implemented a responsive landing page for better user engagement.
- Created a WordPress plugin to connect and manage the React-based application. **Technologies:** React, WordPress. **Sites:**
