

Mohammad Ali Shahsavari

FRONT END DEVELOPER

Front-End Developer | 4+ Years in Web & Mobile Development

With 4+ years of experience in front-end development, I specialize in building scalable, responsive web and mobile apps. I focus on writing clean, efficient code and implementing high-performance user interfaces. Skilled in front-end architecture, state management, and performance optimization, I thrive in agile, collaborative environments. Passionate about continuous learning, I stay updated with the latest technologies to deliver efficient and innovative solutions to every project.

Employment History

Front-end Developer, Mosavar Sazan - Charsoq, Tehran

JUNE 2023 – PRESENT

Charsoq is a data-driven marketing agency specializing in the pharmaceutical industry. I contributed to maintaining and developing features for their Maris application.

Key Responsibilities:

- **Refactored** the background geolocation tracking structure for better performance and reliability.
- **Rebuilt** components for compatibility across Android and iOS platforms.
- **Resolved customer-reported bugs** inherited within the application to enhance functionality.
- **Updated** the Maris project by performing library version upgrades and implementing React Native enhancements.
- **Modernized** deprecated libraries, ensuring compatibility through TypeScript integration.
- **Implemented requested features** from the company to meet business and user needs.
- **Redesigned** and fully implemented the new UI created in Figma, enhancing the UI/UX across all pages for an improved user experience.
- **Contributed** to the development of the new Maris project using Next.js.

Front end Developer, Tadbir Salamat Marham - Pezeshket, Tehran

NOVEMBER 2022 – JUNE 2023

Pezeshket is the largest online health community for Persian speakers, providing 24/7 access to thousands of healthcare professionals. I played a key role in enhancing Pezeshket's web and mobile platforms, focusing on improving user experience and functionality. My contributions supported Pezeshket's mission to make healthcare more accessible and user-friendly through cutting-edge technology.

Key Responsibilities:

- **Designed and developed** responsive web and mobile application pages using React and React Native.
- **Enhanced** the admin panel, Progressive Web App (PWA), and React Native application to improve performance and usability.
- **Collaborated** closely with development and design teams to identify opportunities for improvement and deliver high-quality solutions.
- **Revamped** the main website and social pages, showcasing creativity and advanced design skills.
- **Refactored** the doctors' page and individual doctor profiles, streamlining functionality and optimizing user experience.

Freelance Experience, Ponisha - Karlancer - Freelancer.com

JANUARY 2021 – PRESENT

Automated Crypto Trading Bot – AI-Driven Trade Execution

Project: Integrated an AI-powered crypto trading signal system with Toobit exchange APIs for automated trade execution.

My Role:

- Developed the **trading bot using Python**, implementing logic for executing AI-generated trade signals.
- Integrated with **Toobit exchange API** to: **Place orders automatically** based on trade signals.
Cancel orders when market conditions changed.
Retrieve trade history for tracking and analysis.

Cross-Platform Blackjack Game Application

Project: Built a cross-platform Blackjack game app for Android & iOS using Expo.

Back-end:

- Designed and implemented a **Node.js WebSocket server** for real-time gameplay.
- Developed **REST APIs** for authentication.
- Designed the **PostgreSQL database schema** to store game data, player stats, and session history.

Front-end:

- Implemented the **UI with animations and interactive elements** based on provided designs.
- Ensured a **responsive and visually appealing interface** optimized for both mobile platforms.

GeoMaster – Web-Based Data Visualization Module

Project: Developed a **JavaScript module** for real-time data visualization in GeoMaster, a web-based application similar to StarSteer, using D3.js and WebSockets.

Role:

- Implemented **interactive visualizations** for vertical, horizontal, and trajectory charts.
- Enabled **real-time data editing** through **WebSocket communication** for seamless updates.
- Optimized performance for **smooth live rendering** of geological and trajectory data.

Gonbad Kabud – Kids' Interactive Learning & Storybook App

Project: Contributed to an **interactive learning & storybook app** for children, built with Expo for Android, iOS, and PWA.

Role: Implemented the **UI for authentication & book listing menu** based on Figma designs.

Features:

- **Child-friendly interface** with playful **animations** and characters.
 - **Book listing and navigation UI** for an intuitive user experience.
 - **Parental controls** for time limits and usage monitoring.
-

Hobbies

Reading books and articles.
Playing video games, especially FPS (First Person Shooter).
Watching anime.
Coding

Rekasb Project – Landing Page & WordPress Plugin

Project: Developed a **React-based landing page** and a **WordPress plugin** to integrate **React applications** with **WordPress**.

Details:

- Designed and implemented a **responsive landing page** for better user engagement.
 - Created a **WordPress plugin** to connect and manage the **React-based application**.
-

KTT Company Website

Project: Developed a **responsive and modern website** for **Tolou Taban Company (KTT)**, established in **2008**.

Role: Designed and implemented a **user-friendly interface** to effectively showcase the company's **expertise in infrastructure projects, industrial kitchen consulting, and human resource solutions**.

Focus: Ensured seamless **navigation and accessibility** to highlight their diverse services, including **construction, waste management, and restaurant operations**.

React Native iOS Setup Project

Project: Set up and debugged a **React Native** app using **Xcode** for **iPhone** testing.

Challenge: Resolved recurring setup errors, ensuring smooth **iOS** deployment.

Role: Hired as an experienced **React Native** developer to resolve technical issues.

Movie Download Chrome Extension

Project: Developed a **Chrome extension** to download movies, subtitles (**Persian & English**), and posters from select sites, including **"King Movie"**.

Features:

- Integration with **IDM & FDM** for efficient downloads.
 - **Auto-naming system** for organizing files by **title, year, season, and episode**.
 - **Favorite list** to prevent duplicate downloads.
-

Chess PGN Parsing Function

Project: Developed a **JavaScript function** to parse **chess PGN** strings into move objects.

Details: The function handles complex and varied PGN scenarios.

Testing: Rigorously tested with various PGN formats; **FEN** accuracy verified using chess position editors.

Education

Computer-software at Technical and Vocational University No.1 (TVU)Kermanshah, Kermanshah

DECEMBER 2020 – SEPTEMBER 2025

Left to focus on career growth in software development.
